TASK 1: Create a GIT repository named as your enrollment number. Create 2 folder in your repository named as Assinment_1 and Assignment_2.

Step 1: Create a New Local Git Repository

• I logged into GitHub..

• Clicked on "New Repository".

• Entered my 2302031000075 as the repository name.

• Selected the repository as Public/Private.

• Clicked on "Create Repository".

Step 2: Setting Up the Repository Locally.

• Installed Git if not already installed.

• Opened Git Bash/Command prompt.

• Ran the following command to clone my repository to my computer.
   o Git clone
      https://https://github.com/poojapatel/2302031000075.git

• Navigated to the cloned Repository:
   o Cd :WT/2302031000075

Step 3: Creating Assignment Folders:
   • Create Assignment folders inside the repository.
      o mkdir Assignment_1 Assignment_2
   • Verify folders using following command.
      o ls

Step 4: Adding and Committing Changes:
   • Staged the new folders:
      o Git add.
   • Committed the changes with a message:
      o Git commit-m "Added Assignment_1 and Assignment_2 folders"
   • Push the changes to Github :
      o Git push origin main
